## Poetical Release

The Special Objects for Attentive Hearts were born without pretensions, they appeared slowly showing themselves and when least expected they became a collection. After 20 years working with small formats, they came with the strength of sculpture and design, showing me the possibilities of shapes through metal.

From this exploration of the plates, tubes, wires and billets, the collection of the Elements, the Astrolabes and others that are showing themselves at the moment arose.

This may be my way of telling a story and being part of yours. Through the silences of Air, the murmurs of Earth, the purring of the Sea and the screams of Fire, we meet to share impermanence.

**Be all very wellcome!**
